2022

2022-23

????????????

# Internships

**Now, How Do YOU Crack the Code of  
Getting Into Research Park?**

# Your Presence

**Paper**

**Online**

**In Person**

# Resume

- The great thing about **Research Park** is the companies here know the classwork here
- When you list relevant coursework, **DO NOT PUT IRRELEVANT COURSES**
  - *Karen from HR **DOES NOT CARE** if you took **BBQ Science** if you're applying for **SWE/Data Science Internships***
  - *Karen from HR **DOES CARE** if you took **Data Structures** or **Systems Programming***
  - *In fact, these classes are well known around there*
- Make sure everything is relevant and **QUANTIFY IMPACT** and **SPECIFY TOOLS** where **possible**
- ATS systems online are your **bestie**
- And finally, save it as **LAST\_FIRST\_RESUME.pdf**

# LinkedIn

- Think of it as your **resume** but **on social media**
- **Include any activities, experiences, awards, projects, etc** on there that you feel are relevant that won't be able to fit into your resume
- ***Make custom linkedin url***
- What you *should* really focus on putting out there
  - The Headline
  - Experience
  - Education
    - **Only put UIUC, not your HS**
  - Projects or anything that speaks best to you (research, article you wrote, etc)

**A cold application is a dead application**
